

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM SD/A

SPECIALIZED DISCLOSURE REPORT
(Amendment No. 1)

Civeo Corporation

(Exact name of registrant as specified in its charter)

British Columbia, Canada (State or Other Jurisdiction of Incorporation)	001-36246 (Commission File Number)	98-1253716 (IRS Employer Identification No.)
Three Allen Center, 333 Clay Street, Suite 4980 Houston, Texas (Address of Principal Executive Offices)		77002 (Zip Code)
Frank C. Steininger (713) 510-2400 (Name and telephone number, including area code, of the person to contact in connection with this report.)		

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2016.

Explanatory Note

This Amendment No. 1 on Form SD/A to the Special Disclosure Report on Form SD of Civeo Corporation for the reporting period from January 1 to December 31, 2016, which was filed with the Securities and Exchange Commission on May 25, 2017 (the “Original Form SD Report”), is being filed solely for purposes of 1) amending and restating in its entirety Section 3, including the chart of smelters and refiners listed therein, of the Conflict Minerals Report filed as an exhibit to the Original Form SD Report, and 2) amending and restating in its entirety Section 4 of the Conflict Minerals Report filed as an exhibit to the Original Form SD Report.

Section 1 – Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

1. Introduction

Civeo Corporation (“Civeo” and “Company”), through its subsidiaries, manufactures and contracts to manufacture modular buildings that contain gold, tantalum, tin, tungsten (collectively “3TG”). As these materials are necessary to Civeo’s products, the Company is dedicated to tracing and disclosing the origin of these metals to ensure compliance with the requirements set forth in the final rule regarding use of conflict minerals.

2. Conflict Minerals Disclosures

Civeo has concluded in good faith that during the reporting period for 2016:

- a) Civeo manufactured and contracted to manufacture products for which conflict minerals (as defined in Section 1502(e)(4) of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010) are necessary to the functionality or production.
- b) As such, Civeo performed a reasonable country of origin inquiry (“RCOI”) and subsequent due diligence in an effort to determine whether its sourcing practices directly or indirectly funded armed groups in the Democratic Republic of Congo (“DRC”) or an adjoining country (“Covered Countries”).

In accordance with Rule 13p-1 under the Securities Exchange Act of 1934 (“Rule 13p-1”), Civeo has filed this Specialized Disclosure Form (“Form SD”) and the associated Conflict Minerals Report. Both reports are posted to a publicly available Internet site at <http://ir.civeo.com/sec.cfm>.

Item 1.02 Exhibits

Civeo has filed, as an exhibit to this Form SD, the required Conflict Minerals Report.

Section 2 – Exhibits

Item 2.01 Exhibits

Exhibit 1.01 – Conflict Minerals Report

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

Civeo Corporation

/s/ Frank C. Steininger

Frank C. Steininger

Senior Vice President, Chief Financial Officer and Treasurer

DATED: June 1, 2017

**Conflict Minerals Report of Civeo Corporation
In accordance with Rule 13p-1 under the Securities Exchange Act of 1934**

This is the Conflict Minerals Report (“CMR”) of Civeo Corporation (“Civeo” or “Company”) for the reporting period ended December 31, 2016 (the “Reporting Period”) in accordance with Rule 13p-1 under the Securities Exchange Act of 1934 (“Rule 13p-1”).

1. Introduction

The intent of this CMR is to summarize the results of Civeo’s good faith Reasonable Country of Origin Inquiry (“RCOI”) and describe Civeo’s due diligence process in accordance with Rule 13p-1 requirements.

2. Reasonable Country of Origin Inquiry Description

To implement the RCOI, Civeo’s Tier 1 suppliers, representing 80% of spend in Conflict Mineral supplier categories as defined by the Company, were engaged to collect information regarding the presence and sourcing of gold, tantalum, tin and tungsten (collectively “3TG”) used in the products supplied to Civeo. Information was collected and stored within Civeo’s internal record keeping systems.

Civeo’s supplier engagement efforts followed these steps:

- An introduction was presented and discussed with Tier 1 suppliers describing the Conflict Minerals Compliance Program (“CMCP”) requirements.
- Following the introduction, information was solicited from suppliers on the presence of 3TG in the products supplied to Civeo.
- Throughout the process, suppliers were supported and offered assistance to ensure timely survey completion and submission compliance.
- Civeo performed a series of follow ups with non-responsive suppliers.
- Civeo escalated the request to senior management within the supplier organization where appropriate to ensure supplier participation in CMCP requirements.

Civeo utilized the Electronic Industry Citizenship Coalition (“EICC”) and Global e-Sustainability Initiative (“GeSI”) Conflict Minerals Due Diligence Template (“EICC-GeSI Template”) for data collection.

Suppliers were asked to provide information regarding 3TG minerals present within products supplied to Civeo and the sourcing of these materials with the ultimate goal of identifying the smelters or refiners’ (“SORs”) countries of origin. To facilitate reporting at the product-level, the products indicated by Civeo as being sourced from a given supplier were communicated to that supplier as part of the data request. Suppliers were able to submit multiple Conflict Minerals Reporting Templates (“CMRT”) as needed to address all indicated products. In many cases, however, the supplier responses defaulted to company level CMRTs and were not specifically related to products supplied to Civeo.

Supplier responses were evaluated for plausibility and consistency, and to ensure inclusion of the necessary detail. Additional contact with suppliers was conducted to address issues of incomplete data on EICC-GeSI Templates.

3. RCOI Results

Forty-five (45) suppliers were identified as having supplied materials containing 3TG to be used in Civeo’s manufacturing processes. They were considered in-scope for conflict mineral regulatory purposes and were each contacted as part of the RCOI process.

A total of 405 Smelters or Refiners (SORs) spanning 45 countries of origin were identified as potential 3TG SORs used by our suppliers and sub-suppliers. Below is a summary of verified smelters.¹

As a result of the inquiry process, Civeo was able to identify two SORs of 3TG with an indication of Democratic Republic of Congo/Covered Country (“DRC/CC”) sourcing.

SOR/Facility Name	Conflict-Free Smelter Program Status
GOLD	
Abington Reldan Metals, LLC	No Certificate

Countries of Origin for the above listed SORs are believed to include:

Australia, Austria, Belgium, Bolivia, Brazil, Canada, China, Czech Republic, Estonia, France, Germany, India, Indonesia, Italy, Japan, Kazakhstan, Republic of Korea, Kyrgyzstan, Macedonia, Malaysia, Mexico, Netherlands, New Zealand, Peru, Philippines, Poland, Russian Federation, Rwanda, Saudi Arabia, Singapore, South Africa, Spain, Sudan, Sweden, Switzerland, Taiwan, Thailand, Turkey, United Kingdom, United States of America, Uzbekistan, Vietnam, Zambia and Zimbabwe

4. SOR Facility Description

Below is a summary of the SORs with indications of DRC/CC sourcing and their certification statuses.

Metal	Smelter/Refiner	Certification Status	Mine Countries of Origin
Tin	Phoenix Metal Ltd.	No Certificate – Program Status Unknown Smelter has not registered or committed to undergo a CFSP audit or participate in one of the cross-recognized certification programs. Smelter is not in compliance with CFSP assessment protocols.	Rwanda
Gold	Universal Precious Metals Refining Zambia	No Certificate – Program Status Unknown Smelter has not registered or committed to undergo a CFSP audit or participate in one of the cross-recognized certification programs. Smelter is not in compliance with CFSP assessment protocols.	Zambia

For those declaration responses provided at the company and user-defined level and non-specific to Civeo’s products, the presence of any particular smelter is not necessarily linked to the products that Civeo purchases and uses in its manufacturing operations. Thus, the information provided in such supplier responses was not at a product-level specific to the materials and components used by the Company. As such, the identified SORs and countries of origin identified above have not been confirmed to be present in Civeo’s supply chain.

5. Design of Due Diligence Framework

Civeo’s due diligence process is designed in accordance with the Organization for Economic Cooperation and Development’s (“OECD”) Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas and accompanying Supplements² (collectively, the “OECD Guidance”). It is important to note that the OECD Guidance was written for both upstream³ and downstream⁴ companies in the supply chain. As Civeo is a downstream company in the supply chain, our due diligence practices were tailored accordingly.

² OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, Supplement on Tin, Tantalum and Tungsten and Supplement on Gold, 2013; <http://www.oecd.org/daf/inv/mne/GuidanceEdition2.pdf>.

³ Upstream companies refer to those between the mine and SOR. As such, the companies typically include miners, local traders, or exporters from the country of mineral origin, international concentrate traders and SORs.

⁴ Downstream companies refer to those entities between the SOR and retailer. As such, the companies typically include metal traders and exchanges, component manufacturers, product manufacturers, original equipment manufacturers (OEMs) and retailers.

6. Due Diligence Measures Performed

Due Diligence measures undertaken by Civeo included the following:

- Maintained current the Company's Conflict Minerals Policy. The Conflict Minerals Policy is publicly available at <https://www.civeo.com> ;
- Formalized a standard procedure on Conflict Minerals due diligence and reporting guidelines;
- Assembled an internal team to support supply chain due diligence;
- Established a system of controls and transparency over the mineral supply chain;
- Implemented internal measures to strengthen company engagement with suppliers;
- Included an internal grievance mechanism in the Conflict Minerals Policy;
- Designed and implemented a strategy to respond to supply chain risks;
- Implemented a risk management plan, monitored and tracked risk mitigation, reporting to Senior Civeo Supply Chain Management who evaluated supplier partnerships; and
- Reported Annually on Supply Chain Due Diligence. This CMR and the Form SD to which it is an exhibit are publicly available at <http://ir.civeo.com/sec.cfm>.

7. Steps to Improve Due Diligence

Civeo will endeavor to continuously improve upon supply chain due diligence efforts via the following measures:

- Continue to assess the presence of 3TG in the supply chain;
- Clearly communicate expectations with regard to supplier performance, transparency and sourcing;
- Increase supplier response rate for RCOI process;
- Increase indirect suppliers' rate of product specificity for RCOI process;
- Continue to increase the rate in which Civeo addresses issues including implausible statements regarding no presence of 3TG and incomplete data on EICC-GeSI Templates regarding scrap and recycled sources;
- Continue to compare RCOI results to information collected via independent conflict free smelter validation programs, such as the EICC/GeSI Conflict Free Smelter Program;
- Engage with SORs to obtain mine of origin and transit routes and assess whether SORs have carried out all elements of due diligence for responsible supply chains of minerals from conflict-affected and high-risk areas;
- Undertake additional fact and risk assessments for risks requiring mitigation, or after a change of circumstances; and
- Provide continuing education to members of our Conflict Minerals Compliance team, as well as employees who are involved with supplier and customer contact related to Conflict Minerals compliance.

8. Inherent Limitations

Because Civeo is a downstream user of 3TG, we must rely on the representations and information provided by our suppliers and other third parties within our supply chain. As a result, incomplete, over-inclusive or inaccurate information provided by the suppliers or by a SOR could affect the accuracy or completeness of the information set forth below or other information contained in this CMR.

Note also that many of Civeo's suppliers received responses from their direct suppliers with SOR information based on a company or divisional level, rather than a product-level specific to the materials and components used by the Company. As such, Civeo is unable to confirm all SORs in its supply chain for the Reporting Period.
